Mentor Meeting 3 / 11.20.14

Progress Report

Since the start of the project, we have:

- Successfully developed our specified MVP
- Implemented necessary features that were not included (requests)
- Modified our data model to consolidate objects (loans)
- Deployed a working app

Agenda

Data Model

- Consolidation of loans
- Return/borrow status

Routes

- PUTs for same collection, different fields (item availability / description)

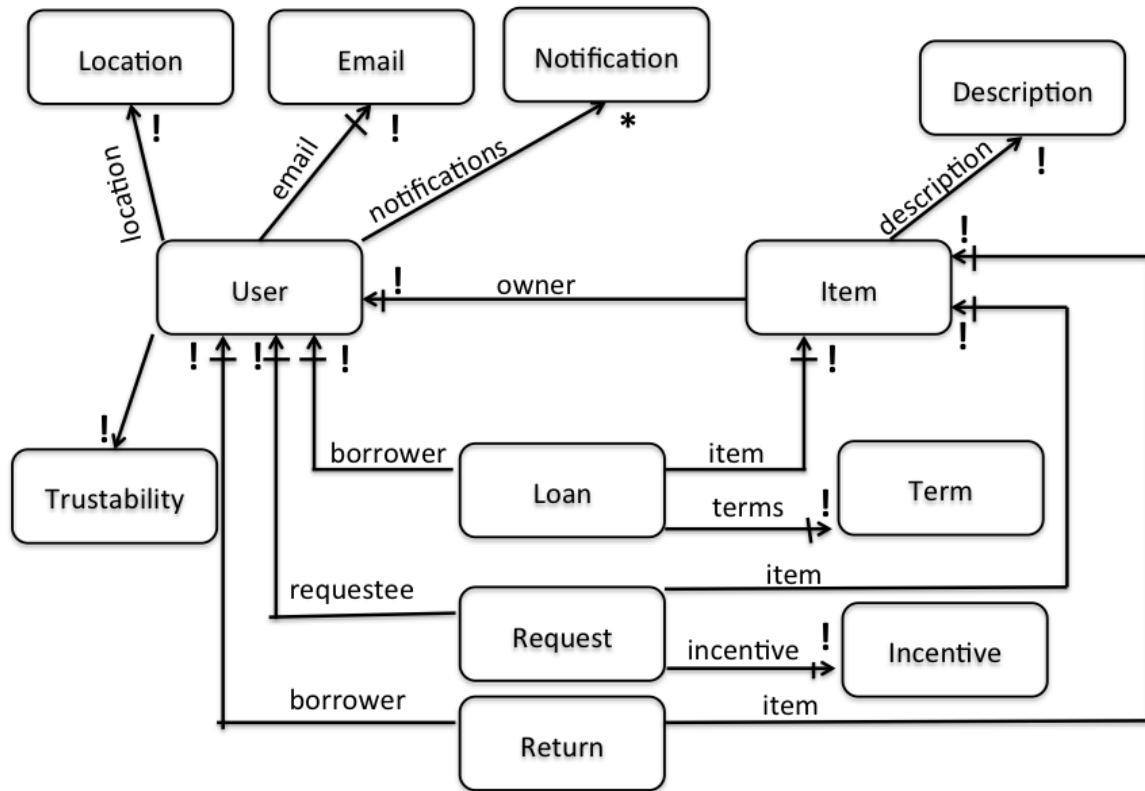

Security

- How to protect against cross site scripting and other higher level issues?

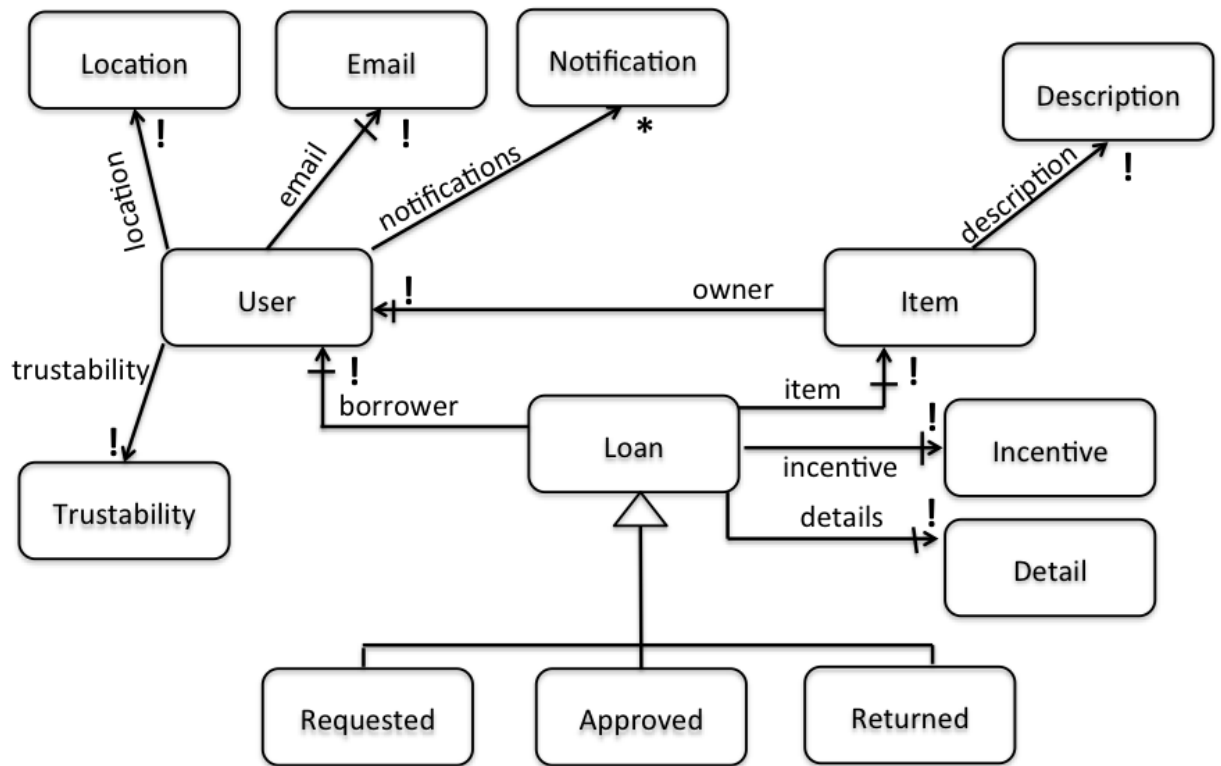

Misc

- BCrypt
- git ignore
- Modularity
- When to rate a user?

Data Model

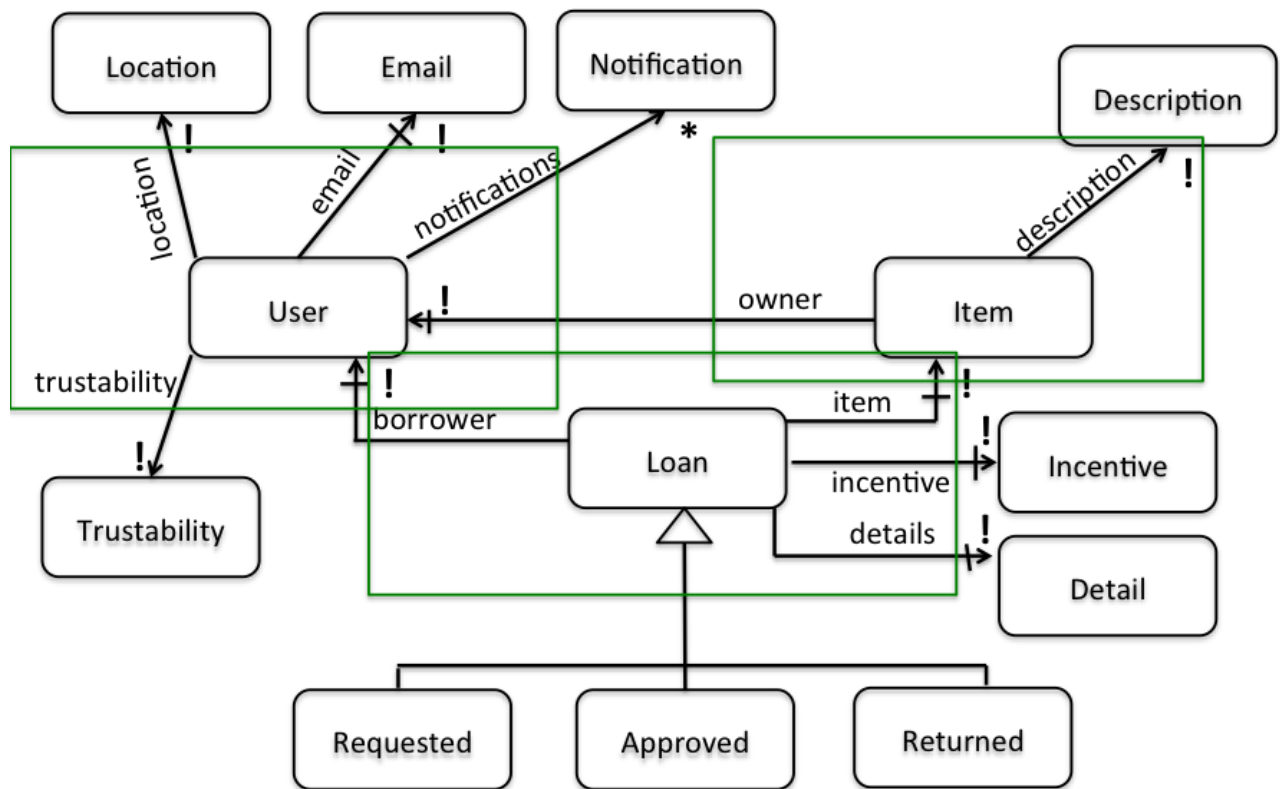

Data Model

There can only be one approved loan for every item

Data Design

There can only be one approved loan for every item
